Summary

The Fiber Network Technician will be responsible for Tier 2 triage trouble reports, fault isolation, dispatching technicians when required and interacting with internal and external customers to resolve and close trouble reports for fiber based voice, data and video services. The Fiber Network Technician will also be responsible for evaluation & resolution of provisioning fallout for fiber based voice, data and video services.

General Duties

Duties include, but are not limited to, the following:

A. Maintenance Control.

- Perform overall maintenance control functions for all fiber network related & undetermined troubles.
- Perform trouble correlation for data & voice fiber network troubles and provide resolution.
- Perform trouble isolation for all network & undetermined troubles and provide resolution.
- Provide direction and support for service assurance functions.

B. Provisioning Control.

- Analyze & resolve network provisioning fallout (ONT, OLT, ATM Switch, gateway Router & Class 5 Voice Switch).
- Perform end to end acceptance testing for network component additions and connectivity.
- Analyze & resolve order flow fallout between network provisioning & multiple order control systems for all voice and data services.
- Provide guidance to the service fulfillment functions.
- Provide guidance to Installation & Maintenance Technicians during service installation and maintenance activities.

C. Order Control.

- Overall service order control point.
- Track, analyze and resolve provisioning fallout orders to completion.
